EDUCATION

Rutgers University

Bachelor of Arts in Information Technology and Informatics

Major GPA: 3.8

New Brunswick, NJ

2014 - 2018

Projects

piq (in App Store)

- Leverages Yelp's API to make business end-point searches, using Alamofire and SwiftyJSON through MVC
- Cloud storage database and authentication is handled by Firebase, and Realm for local storage (implemented, but not currently using Realm)
- Includes dynamic UI and complex animations

NYDimes (in App Store)

- Leverages NYTimes API to fetch popular articles using Alamofire and SwiftyJSON (also implemented URLSession & Decodable) through MVVM.
- Utilizes Firebase for backend
- Dynamic UI setup through using storyboards and programmatic implementation
- Clear and organized code throughout entire application

Work Experience

Gesture

New York, NY

iOS Engineer Intern

September 2020 – Present

- Responsible for developing new design and data flow for the user shopping experience for the Gesture App.
- Collaborated with UI/UX team to produce a refined/updated progression of the shopping experience using the app.
- Ensured clean code throughout the project for readability and scalability.
- Worked on both front-end design and back-end using MVVM architecture.
